Dear Brenda,

Your products, MegaCleanse and Joint Renewal have been instrumental in helping me overcome my gout condition.

In my early thirties, I began to experience an extreme arthritic condition known as gout - a hereditary illness that is caused by a failure to clear purine, a commonly digested acid. Gout is caused by excessive purine levels in the blood stream that periodically crystallize in the joint areas of the body (toes, ankles, knees, etc.). When the purine buildup occurs, it can take days or sometimes weeks for the human body to naturally filter the crystals from the system. Anyone who has gout will tell you that the pain associated with a gout attack is so severe that even the most basic mobility tasks, such as standing or walking, become practically impossible. Typically, I would have 4 to 6 gout attacks per year, and, with each attack, I would visit to the emergency room to get a prescription medicine to accelerate the evacuate of purine from my system. In one instance, I had to have arthroscopic surgery to remove the crystals in my knee.

There is no known cure for gout, and every physician I turned to placed me on strict dietary and prescription regiments. However, this avenue of treatment did not lessen the frequency or severity of my attacks. More importantly, they did not protect my joints as the attacks persisted, and, eventually, the cartilage and tissue within the joints began to deteriorate. I became very afraid to go for long walks, run or exercise because the added stress on my joint areas would actually induce the next gout attack. Clearly, the doctors' treatment was not working, and it is here where I was first introduced to your natural line of products.

I take the recommended dosage of MegaCleanse because I travel often for work, and it's difficult for me to keep hydrated and maintain my dietary discipline. MegaCleanse keeps me regular no matter what the circumstance; an imperative for regulating the purine level in my blood stream. More importantly, it is far less caustic to my system than the prescription medicine, and there are no side effects.

I began taking the Joint Renewal product specifically to rebuild the damaged joint areas, and the effect was nearly instantaneous. I began to witness noticeable improvements in a few short weeks, and after 2 months, I felt healed. That's just the beginning! While I was hopeful for results with rebuilding tissue and cartilage, I had no expectation the supplements would help contain my actual gout problem. But indeed that is exactly what happened! I've had only one attack in each of the years since I began using your product.

Brenda, I don't know how to thank you! I truly believed I was destined for a wheelchair. Together, the Joint Renewal and MegaCleanse provide the most effective defense I could ask for, and they are able to do what the prescription medicine could not: proactively keep my purine levels low and repair and strengthen the joint tissue thus making them far less susceptible to attacks. Bravo! I'm definitely a lifetime customer.

With Best Regards,

Bill Ianni
