Dear Brenda:

In regard to your product. I thought it was like the many products I had tried. You see I have had 3/4 of my stomach removed, 3/4 of my colon removed and an operation after that on the small intestines. Seemed my operations were helping for a short time but oh the suffering. I started your product and felt real good at first. Then it seemed like well I was taking so much and thought I would have to keep taking it. And to be honest that would be much better then operations if I had to take a bottle a day. But then I realized I didn't have to take as much. I have gone for the first time in three years without an operation for a year. I find when I catch a bug or whatever if I take more pills I get over it faster. This happened with my daughter too. It in the beginning when I first started your product it helped with the pain. Now I don't have pain as often and when I do I take a few pills and it goes away.

My friends and family have seen such a difference in me that they also have started to use it. I'm just glad I stayed with your product because there is a time, very short time, but a time you feel like stopping. Can't even say why. But everyone I know has gone through that time. When you pass that time is when you see the best results. So staying with it is the key.

I breath better, less pain, and the best is I needed one more operation and it looks like I wont need it. This product helps you mentally and physically thank you for getting it into the stores here in Ca. I hope the same will happen when I go to New York. It is nice to be able to run in and get your product. I'll keep in touch with my laptop with you.

Thanks again
Carol Ellison
