**Subject:** Rave review on all of your products

Dear Brenda,

I became aware of your colon products while working at a local health food store back in 2008, however, at the time the Mega Cleanse just didn't seem to work for me though my husband has been on it & is very happy with the results. It was only after I spoke with you and began using Thera Cleanse in combination with the Mega Cleanse that I started having success. I also use the EX formula as well and couldn't be happier that for the first time my eliminations are where they should be after a lifetime of weakness.

This last fall I began using your skin care and have been needing to see over a bit of time how the products work for me. I was diagnosed with an immune issue over 30 years ago which ravaged my skin and left me quit scarred so to say the least I have to take things rather slow. Your skin care is so gentle and effective that I have been able to use almost everything with complete success. Having an Aloe Vera base to your products is so healing to start with and the botanicals add the winning combination. I knew when I used your cleanser the first time that it was fabulous because it rinsed every bit of makeup out of my washcloth leaving not one stain behind. It never leaves my face feeling dry or drawn as so many products do. After having an allergic reaction recently and breaking out with a rash all over my body, I began using the cleanser as a body wash & followed up with the toner as my skin was on fire. Will continue this forever as it is a winning combination. The cleanser is so concentrated that it doesn't take much.

My skin feels clean, nourished & hydrated with improvement to the texture and pore size.

Thank you & Jack for all of that it has taken to produce such superior products & provide the information to go along with it. You both are so helpful & your service is as great as your products.

Sincerely & with much gratitude,

Sharon Kelly

P.S. I loved your body lotion though the fragrance was a bit overwhelming for me even though it is natural. Have you considered coming out with a fragrance free version? There really hasn't been anything else that I have tried that I don't love & have great success with.
