

**Joint Renewal Complex addresses joint damage, pain, inflammation and cartilage breakdown.** Healthy cartilage is a smooth, firm, tough tissue made from three major substances collagen, proteoglycan aggregates, and water. It is the proteoglycans, densely swollen with absorbed water that gives healthy cartilage its unique characteristics.

**Synthesis of new cartilage components requires vitamins and minerals.** When the body is lacking these nutrients then it becomes impossible to replace worn out cartilage with new, healthy, cartilage resulting in joint pain and disease. Joint Renewal Complex supplies these necessary nutrients to aid joint and bone renewal.

**Glucosamine Sulfate, Chondroitin, MSM and Hyaluronic Acid** have been combined with twelve other vitamins, super foods and herbs making it a very comprehensive formula to rebuild worn cartilage and reduce pain causing inflammation.

**Increasing Range of Motion** Joint Renewal's groundbreaking formula rapidly increases the viscosity of all of the joints. Osteoarthritis can eliminate the fluids and gaps between bone ends within the joint. Joint Renewal provides our joints the fluids and lubrication we need to move pain free. In addition, Joint Renewal coats and protects the areas within the joint, allowing them to glide without friction within the joint.

## Supplement Facts

Serving Size 6 Capsules    Servings Per Container 30

	Amount Per Servings	%DV
Vitamin B-6 (Pyridoxine HCL)	50 mg	2500%

### 10 years pain free

Dr Tom hall in Victoria TX first told me of your Joint Renewal. That was 10 years ago and Dr. Hall has since passed. I rode bulls for 13 years and my knees were a mess. As long as I take the Joint Renewal I have no pain. I have told many folks about this and they too have been happy with it.

### I don't ever want to run out

I started taking Curcumaxplus and Joint Renewal a year ago after a freak accident. I fell 6 feet into an empty pool. I broke both ankles and my left leg. My right heel was crushed and had to be rebuilt. I will say that the minute I run out of these products I can tell a huge difference. It has taken me a year but now I am able to walk! Thanks for these products. I love the Skin Drink as well.

### Worked for Pain in my Hands

This product has done so good for me. It has helped the pain from arthritis in my hands so much. I have a bone that has swollen where my wrist meets my thumb. It hurt so bad and even my doctor noticed it. Thanks for a product that works.

### This Works Great Too

I just left a review for the Curcumaxplus and ditto the Joint Renewal. It works fantastic in combination. I have less pain, and some days no pain from osteoarthritis in my neck and shoulders. I have taken these products for over 5 years now and I recommend them highly.

### This has Kept me from Surgery

Thanks you so much for these wonderful products. I take just about all that you have and have benefited so much. My doctor recently told me that i was doing so good that he only needed to see me yearly at this point. My knee is well and I know that taking these supplements for 19 years is partly responsible for that as well as how good I feel!

### Bone on Bone

One of my knees is bone on bone. I have tried several products and had not found a thing that worked, I then tried the Joint Renewal. Took a complete bottle as directed and began to feel the difference, then made the mistake of running out. BOOM, there was the terrible pain again. I can not explain how it works, since I am bone on bone, but it is giving me relief and I will not run out again! If you are reading this because you have joint problems this is the one to get.

### Can't walk with out this

I found this in a health store in Texas and have been taking it for several years now. I was told I needed a knee surgery but due to many unexpected family issues I kept putting it off. This has kept me going. I know for sure this is working for me because if I forget it, I am unable to walk with out a lot of pain. I love the skin care as well. Thanks for such good products.
