

Maxzorbceuticals Nu Born Skin contains 18 ingredients to give the body what it needs to build and protect healthy skin inside and outside of your body. These are the most potent ingredients and antioxidants known to combat all the things that rob of us of the beautiful skin that we want.

Antioxidants like **DMAE**, **Alpha Lipoic Acid**, **Blueberry extract**, and **Grapeseed extract** work to stop free radical damage to your skin and other organs.

What are **Free Radicals** and how can they damage your skin?

Free radicals are unstable oxygen molecules inside the nucleus of your cells that have lost an electron. These unstable molecules are frantic to balance themselves by stealing an electron from another molecule thus setting off a chain reaction of destruction of DNA.

More damage is caused when this process activates the matrix metalloproteinases enzymes that chop up connective tissues that form collagen, thus leading to **wrinkles**, **sagging skin**, and **dark spots**.

We can prevent matrix metalloproteinases enzymes from forming if we have ample amounts of **ANTIOXIDANTS AVAILABLE TO THE CELLS!**

Nu Born Skin supplies some of the strongest antioxidants as well as other important nutrients that support more healthy and beautiful skin.

Veins on my Face Disappeared

I have been taking Nu Born Skin for a couple of months now and noticed the skin all over my body was softer. However, the most exciting improvement was having veins on my face disappear. This product works quickly and I highly recommend Nu Born Skin.

Big Difference in Crepiness!

I was taking quite a few different supplements and ran out of the Nu Born Skin. I thought to myself, "do I really need this one"? Well let me tell you, I saw firsthand how bad I DID need it! Wow, the crepiness started to come back. I had noticed that I wasn't as radiant. I recommend this highly, but if you get it, don't stop it!

My Hands Look Younger

When I purchased this I wasn't sure that it would make any noticeable difference. I have noticed that the veins in my hands seem to be less noticeable. My skin in general looks better. I am a believer! Thanks for making such quality products that work.

Discoloration has Improved

Discoloration has improved and I don't have hormone breakouts while I take this on a regular basis. Highly recommended.
