Dear Brenda,

Just wanted you to know how good the probiotics Digestives are working for me.

About twelve (12) yrs ago I had an anal fissure repair and since then I was more aware of how important it was to use probiotics and a digestive enzyme; however, I was using them before this surgical procedure, but using them separate by some other companies. When I started using your combined formula, it made all the difference in the world for me.

I had my scheduled colonoscopy on 6/3/11 and everything looked really good according to the MD. I had no polyps and I had two (2) when I had the surgical procedure 1/2 yrs ago.

I take your probiotics/digestive formula daily, it has really made a difference with my digestive system. I plan to keep taking these.

Thank for all your company does in keeping us informed!
