Dear Brenda,

I want to thank you for your products as I would not have been able to stay on my recent HCG protocol without them!

I became extremely constipated due to the diet. The Thera Colon Cleanse along with the Total Digestion Probiotic totally eliminated that problem.

I have continued to take both of these products as I feel they have kept my system in good working order and I feel it cleanses out unwanted toxins from the food, air, water and just living.

As an extra bonus, I noticed that the Probiotic kept my belly bloat at bay!

My daughter had recent hernia surgery. The pain medication made her extremely constipated. I gave her the Thera Colon Cleanse and the Total Digestion and it worked like a charm.

I have passed this information to the lady that runs the HCG clinic here, and have posted it on their face book. I hear many clients complain about being constipated when I am waiting for my appointment. I tell them, and hope they will try this because it takes care of the problem.

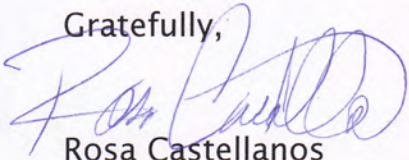

I have severe RA and you suggested adding the Joint Renewal and the CucuMaxPlus to the mix. It truly did keep my pain in check and I don't have to take risky prescription medications as long as I take the prescribed dose of your good stuff.

The diet demanded that I not use my usual skin care as it had oils that were not allowed. I was shocked at how the Oil Free Hydration worked on my skin! Plump and moist! I used it on my face and body.

Before I found this, I tried other ones that were oil free but found them to still leave my skin with an uncomfortable dryness, and my face looked dull. Not so with Skin Drink!

I hope anyone who has any of these issues or is on the HCG diet will find you as well. These things work!

Gratefully,

Rosa Castellanos
