

9/8/19

Hi Brenda,

Many years ago I was diagnosed with fibromyalgia.

Fast forward to 2008. I began to have stomach issues and the doctor told me that in addition to the fibromyalgia, I also had diverticulitis, and IBS. He prescribed Lyrica which did seem to help me for the next 7 years.

On a recent trip to Pennsylvania, I became seriously ill and was admitted to the hospital with an infected colon. I was there for 5 days with drains, and heavy antibiotics to relieve the condition enough to travel home.

I was absolutely petrified when the doctor said that I would most likely have to have a portion of my colon removed and that I would have colostomy bag!!!

I had recently gotten married and was devastated by this.

As my cousin, I knew you had herbs and vitamins and other nutritional products and had always thought to myself. "I don't need that stuff because I feel pretty good most of the time"

When I told you about my prognosis, you told me of many of your clients who had been able to alleviate their stomach and bowel issues. Some as serious as mine.

After reading as much as I could and looking at the many letter on your site, I decided that I would try it.

I took the following:

Mega Wellness Cleanse, Mega Cleanse Extra, Total Digestion Probiotic with Digestive Enzymes, Curcumaxplus, and the Platinum Plus CBD Oil.

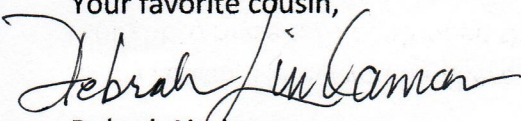

Slowly but surely I felt my body getting better.

Upon my last visit to the doctor I was told that my colon had healed itself and I no longer needed the dreaded surgery!

I am so very happy and so glad that I decided to take this course of action.

I will never be without these products as I know they are continuing to KEEP me well.

Your favorite cousin,

Debrah Lindamen
