Hi Brenda,
My name is Lurra Calahan and I want to thank you for
your Mega cleaners.

In March of 2000 I was diagnosed with a rare lung disease
Lymphangioleiomyomatosis. I was told that I could not eat
certain food. Corn bread, fried food and use salt. If I ate
these my lungs would fill with fluid, and I would be up at
night coughing this stuff out of my lungs

I heard you talking about your cleaner and decided to try it.
I started using the cleaner, especially if I ate something I
was not suppose to eat. My lung never filled up. The cleaner
cleaned it right out.

A few weeks ago my doctor prescribed some medicine for and
I had a bad reaction to it. My lungs filled up and I miserable.
I took the cleaner, Mega and extra mega. Believe when I tell
you they work. I was up all night going to the bath room and
the next morning there was only a small amount left in my lungs.

Another thing I have gritted my teeth as long as I can remember.
Sometime It would be so bad I would wake myself up. Went on a
trip, told my roommate that I grit my teeth. If it bothered her
I would put my piece in. Guess what I did not grit my teeth.

Again thank you so much for you Mega , Extra Mega cleaners and
your Joint Renewal.

God bless and keep you is my prayer and may He continue to bless
you as you help others.

Lurra Calahan
