Body Dynamics

Dear Brenda,

I have never written a company in regards to the products that I am using for my health needs. However, I wanted to take the time to let you know that your products Mega Cleanse and Mega Cleanse Extra have tremendously helped me with a medical condition I have been fighting for about 15 years.

Fifteen years ago I was diagnosed with endometriosis, I have underwent two laproscopic surgeries and was informed that I would need to have a full hysterectomy after I finished having kids. I have had IBS, severe pelvic pain (like stabbing knife pain), lower back pain, and mood swings.

A few months into taking both Mega Cleanse and Mega Cleanse Extra, I noticed that my pain had ceased, however, I stopped taking the products for a few weeks and noticed all my symptoms had come back and I was a very miserable person to be around. I immediately placed an order and started myself back on the products. I was able to cancel my hysterectomy. I have yet to reschedule

I have recently told a few family members and friends about the products and they have also been inclined to order and take the products as well. So, thank you Brenda for an outstanding product that has helped me in my battle with endometriosis and IBS.

Sincerely,

Tanya Hathorn
